Preface

Programme

Sessions

Session 1 Balance between Semi-Automated Scene Analysis Systems

Jamet, O., Alraoui S., Guillevin L. Two Approaches to Semi-Automated Capture Processes in a National Agency

Thorpe, J. Balance between Semi-Automated and Automated Scene Analysis Systems

Session 2 Pro's and Con's of 3D Object Modeling

McGlone, C. Some Considerations in 3D Object Modeling

Pua, P. Optimization

Session 3 Interpretative Models and Reasoning Strategies in Scene Analysis

Neumann, B. Schröder, M. Knowledge Representation in Scene Analysis

Schenk, T. Interpretative Models and Reasoning Strategies in Scene Analysis

Session 4 Implementation of Scene Analysis Algorithms

Haggrén, H. Implementation of Scene Analysis Algorithms

Mayr, W. No manuscript available

Session 5 Matching, Grouping

Nevatia, R. Role of Matching Algorithms in Automated Scene Analysis

Boyer, K. The Role of Perceptual Organization in Automated Scene Analysis

Session 6 Visualization and Simulation

Gross, M. 3D Modeling and Approximation for Visualization

Lukes, G. Cartographic Support for Advanced Distributed Simulation

Session 7: Geometry in Scene Analysis

Boyer, K. Aspects of Modeling and Stochastic Analysis of a 3D Straight Line

Uncalibrated Vision

1995

The Role of Models in Automated Scene Analysis

Joint Workshop of
ISPRS WG III/2 and
IC WG II/III

August 30 – September 1, 1995

Stockholm, Sweden

K. Torlegård, E. Gülch
Editors

TIB/UB Hannover 89

139 924 159

Royal Institute of Technology
Department of Geodesy and Photogrammetry
Stockholm, Sweden
1995
